Fellow beef producers, we want you to know...

As life-long commercial beef producers, we always knew the kind of bulls we would offer our customers if we ever decided to market registered seedstock. Today, we use all the available genetic evaluation tools to continually make progress. But, we also place tremendous selection pressure on those hard to measure traits, such as survival in tough terrain and foraging ability. The bulls we offer today are athletic, phenotypically sound Angus sires with the genetic ability to move your herd forward and survive in the toughest environments.

We want you to know we're commercial beef producers first. Our cattle must work. Period. Those genetics that perform remarkably well are offered to our customers.

WE KNOW OUR REPUTATION RIDES ON EVERY BULL!
